

K920 TRIPOD

PRODUCT DESCRIPTION

The KJI K920 Tripod is a carbon-fiber, two-section tripod built for hunters and precision shooters who require heavy-duty stability with simple, reliable adjustments. Weighing only 5.8 lbs. yet rated for 170 lbs. of support, it delivers dependable strength for the largest rifles and optics.

With a height range from 66.4 inches down to 7.25 inches and three adjustable leg angles (23°, 55°, 83°), the K920 adapts easily to standing, kneeling, and prone shooting. CNC-machined twist locks and hard-anodized aluminum components provide rugged durability, while rubber and spike feet ensure grip on any surface. Compatible with KJI Reaper systems and ball heads, the K920 is ready for demanding use in the field.

USE CASE

Hunters

- Rock-solid shooting base on unstable or uneven terrain
- Independent leg angles adapt to hillsides, brush, and rough ground
- Interchangeable feet grip shale, dirt, grass, or mud
- Keeps the rifle steady when the shot window is brief

Tactical & Professional Marksmen

- Built for overwatch, surveillance, and field shooting
- CNC-machined twist-locks hold tight under heavy rifle setups
- Handles thermals, NV, lasers, and rangefinding systems without flex
- Integrates seamlessly with KJI Reaper platforms for true mission use

Competitive & Long-Range Shooters

- Eliminates tripod wobble on the firing line
- Fast height changes for standing, kneeling, or prone transitions
- Carbon fiber options keep field weight low
- Aluminum variants withstand constant match abuse
