LASER RANGEFINDER MONOCULAR

Display

The LRM 1800S combines excellent 7x optics with the world's most advanced laser rangefinder technology. Revised approaches in optical and electronic engineering allow target acquisition at longer distances with better reliability under a wider range of weather conditions. This model allows observation of distant objects with superb image quality plus it measures the distance to the object up to 1,800 meters (output display in yards also). The LRM 1800S also has a built-in speed detector. Aim and click - and you have everything you want about your target.
