Fits tube size	30 mm	34 mm
Weight (oz)	.64	.70
Torque	10-12 in lbs	10-12 in lbs

Sightmark's Bubble Level Rings are crafted out of aircraft-grade aluminum for a lightweight, durable design and are available in two different ring diameters, 30mm (SM19044) and 34mm (SM19045). Quickly attach the bubble ring to your riflescope with the single bolt attachment. The bubble level ring helps distribute pressure evenly when tightening and features a highly visible center line that easily ensures the bubble is properly centered, eliminating an offset riflescope.
