Weight, oz	35.2

The Sightmark® Night Raider™ 3x60 night vision riflescope is a universal night optic designed for nighttime hunting and observation. The Night Raider is a passive starlight device, which means it does not require an artificial or IR light source to operate; however, the built-in IR illuminator substantially enhances viewing capabilities, especially in environments of absolute darkness. Adding to its superior functionality, the Night Raider boasts a stabilized power supply that resists recoil and ensures an uninterrupted power supply while shooting. Also included is a durable protective flip-up objective lens cover, remote control, and a photo / video adapter. With all these features, included accessories and a Limited Lifetime Warranty, the Night Raider 3x60 is a necessity for any hunting or shooting enthusiast's arsenal.

Sightmark Night Raider™ 3x60 NV Riflescope

FEATURES

- Two-color range finding reticle (red or green)
- High quality image and resolution
