

20-60x65 mm Spotting Scope

Winchester Supreme spotting scopes incorporate brilliant fully multicoated glass that transmits intense colors and crisp detail, even in low light conditions. Color-saturated images with razor-sharp contrast and clarity that make the smallest details come to life. A smooth focus dial allows precise adjustments to define fur, feathers or antlers at extreme distances, and a large magnification range means your 100% waterproof spotter is perfect for all your outdoor adventures. A rotating collar positions the scope for maximum comfort and utility on the bench or in the field. Light weight and ergonomic, your Winchester Supreme spotting scope comes with a bench top tripod and a quality protective case designed for field use and carry.

Maximum power for the finest details at the longest distances! Our 65mm version provides ample power for hunters on the move, and our 80mm version allows maximum light transmission to the eye for the sharpest contrast and detail in all conditions, especially dawn and dusk.
